Monitoring and Evaluation

The online Monitoring and Evaluation training/retraining program is designed to improve the overall capacity of healthcare workers for efficiently monitoring and evaluating the response to the HIV/AIDS epidemic in The Republic of Uganda through the application of M&E techniques, including measurement of achievements, review processes, and routine data gathering. Because the training program is delivered online, it offers a much more flexible and supportive learning environment that meets the needs of all trainees. All you need is a computer with reliable Internet access!

To register, visit
